

**Create your own private steam bath** with our residential steam generators. Converting any shower or tub is as simple as fully enclosing your shower and preparing your walls and ceiling properly during your remodeling or new construction project. The compact steam generator can be mounted within 25 feet of your enclosure in an out of the way location (see common mounting locations opposite). Plumbing and electrical connections are similar to those for a common residential water heater. A steam bath will add value to your home, help relieve daily stress and relax tight muscles, while revitalizing your mind and body.

**Amerc and Steamist** are both recognized as the top commercial steam boilers in the world. We are able to distribute for both brands, due to the buying power and national influence of Apex. Your Apex sales consultant has the unique ability to review your commercial project to help you to determine what brand, control option, and kw size best suits your needs.

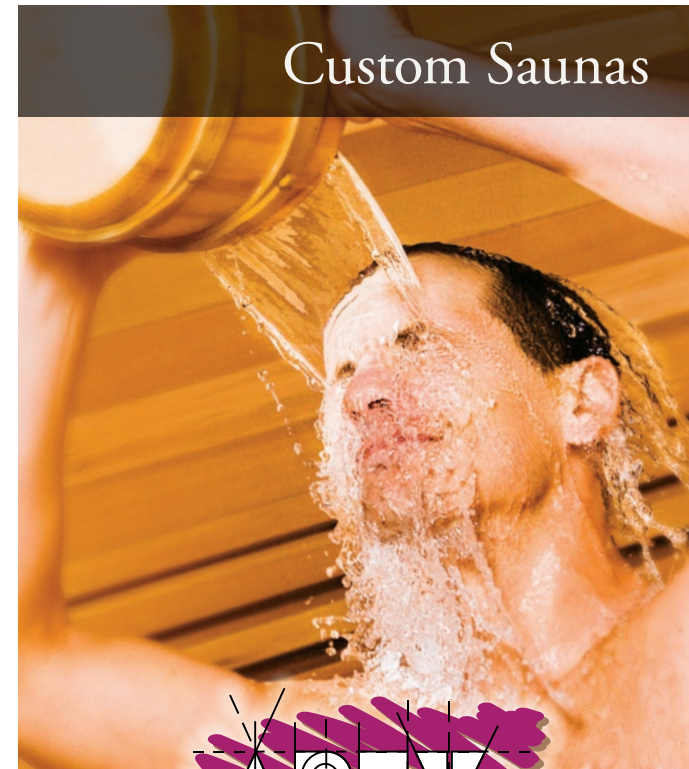

**Joe Leahy and Doug Smith** founded Apex on the principles of strong customer service. Trained Apex employees provide local on-site consulting using only the finest workmanship and materials. This unmatched “local” one-on-one business model has allowed us to assist thousands of satisfied customers since 1984.

Apex’s “On Target” Quality Program begins at our manufacturing facility in Woodinville, Washington. Each product must meet specific quality standards that are reviewed by each production crew member. The product is then reviewed by our Inspection and Shipping department. Apex’s trained installers are the final check on each product. No other sauna product in the industry is inspected by three different factory trained personnel.

Local On-site Installation & Service  
**Free consultation.**

**Custom Steambaths**

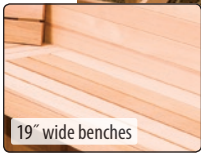

## Standard pre-cut saunas

**Standard Pre Cut Saunas (SPC)** are installed into rooms that are already framed, insulated, wired and sheet rocked. They are offered in standard sizes, or more commonly custom pre-cut to fit your exact room using our free CAD design services. We work with you and/or your contractor to make sure your room is designed and installed just the way you want it. The SPC package includes 1/2" thick Western Red Cedar for the walls and ceiling, 19" wide benches, Douglas Fir door, sauna heater, and "Dri-Dek" tiles in the walking area. Our standard accessory package includes a pine bucket, pine dipper, thermometer, wall light and head/back rests. These packages can be used in either residential or commercial applications.

Fir door

1/2" thick cedar

19" wide benches

Head/back rests

Open space btwn. benches

## European pre-cut saunas

**Our European Pre-Cut Saunas (EPC)** are the deluxe version of our standard pre-cut saunas. The European package is installed into rooms that are already framed, insulated, wired and sheet rocked, and includes our extra thick 11/16" Western Red Cedar for the walls and ceiling. Also included are 23" wide curved front benches, an upgraded cedar trim package, a cedar door, sauna heater, and cedar slated flooring. The upgraded trim package creates the most comfortable bench in today's sauna market by providing a full length curved backrest and custom curved bench trim. Our EPC accessory package includes a copper bucket, copper ladle, thermometer/hygrometer, sand timer, wall light, and contoured leg rest. Standard sizes range from 3'x4' to 12'x12' but we recommend having a custom pre-cut made to fit your exact size and shape using our free CAD design services.

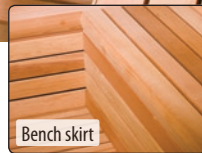

Curved back rests

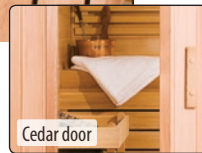

11/16" thick cedar

23" Curved front benches

Bench skirt

Cedar door

## Modular saunas

**Apex Modular Sauna packages** are free-standing structures that can be assembled in any existing interior space. The insulated pre-assembled wall and ceiling sections are shipped in easy-to-handle panels for quick assembly. Our standard package includes wall panels with Western Red Cedar mounted inside and out, an "All Glass" door, pre-assembled benches, sauna heater, and cedar flooring. Our standard accessory package includes a pine bucket, pine dipper, thermometer, wall light and head/back rests.

## Infrared saunas

**The Amerrec Far-Infrared** sauna induces deep sweat for cleansing and detoxifying the body while burning calories. Our standard models include Color Light TherapySystems and Radio/CD players. The upgraded models will also include TVs and DVD players.
